## Summary of fund objective

The Fund aims to achieve long term capital growth. The Fund seeks to achieve its objective by investing primarily in a concentrated portfolio of Chinese healthcare companies. Such companies will be listed on the Shanghai or Shenzhen Stock Exchanges, traded via Stock Connect (which may include companies listed on the ChiNext Board or the Science and Technology Innovation (STAR) board) as well as those listed or traded elsewhere, included via Qualified foreign investor(s) (QFI). Up to 30% of the NAV of the Fund may be exposed to China-A shares via QFI. For the full objectives and investment policy please consult the current prospectus.

## Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of the fund is invested in less developed countries, you should be prepared to accept significantly large fluctuations in the value of the fund. As this fund is invested in a particular country, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate. The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund. The fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the fund. As this fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate.

## Fund Strategy

Our investment strategy combines a deep understanding of key industry drivers and a robust bottom-up stock selection approach. We focus on Chinese healthcare companies with long-term growth potential based on industry leadership and competitive advantages, clear business strategies and transparent corporate governance. Our strategy not only looks at large market leaders but also small and medium sized companies, which have unique competitive advantages in different subsectors. The fund has higher exposure to CROs (Contract Research Organisations) and CDMOs (Contract Manufacturing Organisations), as well as selected exposure to pharmaceutical companies with strong pipelines of innovative drugs.

**Past performance does not predict future returns.** Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in the headline.

\*At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows (designed to ensure compliance with such sanctions). The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market. In addition to sanctions targeting entire countries, there are other thematic regimes, which may focus for example on human rights, cyber attacks, terrorist financing and corruption, which may apply to both individuals and/or entities/corporations.

Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to: <https://www.invescomanagementcompany.lu/lux-manco/literature>.
