### Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As this fund is invested in a particular sector, you should be prepared to accept greater fluctuations in the value of the fund than for a fund with a broader investment mandate.

### Fund Strategy

A sector-oriented product that seeks to invest in equity securities of health care companies that the portfolio managers believe are positioned to compound multi-year growth. The team seeks to capture investment returns by employing their health care expertise and conducting in-depth fundamental research with the philosophy of 1) focusing on innovative health care companies, 2) seeking to capture asymmetric investment returns, and 3) managing risk proactively.

**Past performance does not predict future returns.** The performance period shown here starts on the last day of the first indicated month and ends on the last day of the last indicated month.
